

Goldie Harshad Vaghela

Data Analyst | Engineering & Operations Background

Helmstedt, Lower Saxony | +4915208301060 | vgoldie29@gmail.com | linkedin.com/in/goldiev | github.com/ghv29
German work authorisation: Aufenthaltserlaubnis (valid to Oct 2026) — no employer sponsorship required

PROFESSIONAL SUMMARY

After five years working across manufacturing, research, and large-scale logistics operations, I moved into data analytics to tackle the analytical side of problems I encountered first-hand — from production optimisation at Tesla's Gigafactory to operational performance tracking at Amazon. Completed an intensive Data Analytics Bootcamp at Ironhack (Jan–Mar 2026), building end-to-end projects with Python, SQL, Tableau, and AI tools. My domain knowledge in automotive manufacturing and supply chain is a practical edge that most data candidates lack.

TECHNICAL SKILLS

Programming & data	Python · Pandas · Scikit-learn · SQL · PostgreSQL · MySQL · SQLAlchemy
Visualisation & BI	Tableau · Matplotlib · Seaborn · Plotly
AI / tools / deploy	Streamlit · OpenAI API · Grok API · Pinecone · SHAP · Flask · GitHub Actions · BeautifulSoup · Selenium
Other	Excel · AutoCAD · Monday.com · Notion API

PROJECTS

StellenRadar — Job Intelligence Dashboard

2026

Individual capstone project — Ironhack Data Analytics Bootcamp | github.com/ghv29

- Built a job matching platform for the German data analytics market by scraping live listings from StepStone
- Extracted 70+ bilingual skills via a rule-based NLP pipeline; ranked jobs using a 7-component hybrid scoring engine
- Integrated OpenAI embeddings with a Pinecone vector store for semantic search and AI-powered Q&A
- Delivered as a live Streamlit dashboard with automated Notion job tracking and GitHub Actions-driven scraping

Stack: Python · PostgreSQL (Neon) · Pinecone · OpenAI · Streamlit · Notion API · GitHub Actions

Turbofan Predictive Maintenance — RUL Prediction System

2026

Individual capstone project — Ironhack Data Analytics Bootcamp | github.com/ghv29

- Built a predictive maintenance system on NASA's CMAPSS turbofan dataset to forecast engine remaining useful life
- Engineered 44 features including rolling sensor statistics; achieved $R^2=0.858$ (RMSE 15.51 cycles) with a tuned Random Forest model
- Deployed a Streamlit fleet workbench with SHAP explainability and an AI maintenance advisor; REST API via Flask
- Published an interactive Tableau dashboard for fleet-level health monitoring and engine classification

Stack: Python · Scikit-learn · SHAP · Flask · MySQL · Streamlit · Plotly · Tableau · Grok API

Group Projects — Ironhack Data Analytics Bootcamp

2026

- FIFA Player Data Analysis (2019–2023): Longitudinal analysis of 122,000 records across 5 seasons — Selenium scraping, EDA across 6 hypotheses, data quality pipeline
- US Data Job Market Analysis (2024): Salary benchmarking across roles, industries, and geographies using Python, SQL, and Matplotlib

Stack: Python · Pandas · Selenium · SQL · Matplotlib · GitHub

WORK EXPERIENCE

Operations Lead

2025

Amazon — Helmstedt, Germany

- Co-managed shift operations for a team of 50–60 associates alongside two other team leads, responsible for workforce allocation, task planning, and adherence to quality and safety standards
- Monitored and reported operational KPIs using Excel and internal analytics tools to Shift and Area Managers
- Led cross-functional continuous improvement projects targeting productivity, safety, and quality outcomes
- Deputised as Shift Lead on multiple occasions, taking full accountability for shift-level decisions

Project Manager

2023 – 2024

Textilforschungsinstitut Thüringen-Vogtland e.V. — Greiz, Germany

- Managed research communication and knowledge transfer projects end-to-end — from planning to delivery
- Secured funding from government bodies and industry partners by identifying and pursuing grant opportunities
- Coordinated cross-team stakeholder communication to ensure smooth and transparent project delivery

Production Associate

2022 – 2023

Tesla, Inc. — Grünheide (Gigafactory Berlin)

- Performed Model Y chassis assembly on a high-volume production line while consistently meeting quality targets
- Conducted visual quality inspections during assembly; identified and escalated defects to support teams
- Trained newly onboarded associates on assembly procedures, contributing to efficient team ramp-up

Project & Research Intern

2020 – 2021

G&G Stadtsysteme GmbH — Berlin

- Led a 5G market research project for the DACH region; managed project timelines and task allocation
- Produced structured stakeholder documentation via Monday.com; co-developed smart city 5G use cases

EDUCATION

Data Analytics Bootcamp

Jan 2026 – Mar
2026

Ironhack — Germany

Intensive full-time programme · Python · SQL · Machine Learning · AI agents · Tableau · Streamlit

Two individual capstone projects deployed to production · github.com/ghv29

MSc International Technology Transfer Management

2019 – 2022

Fachhochschule des Mittelstands — Germany

Focus: Innovation Management · Smart Factory · International Project Management · Globalised Economy

Thesis (completed 2022): Internationalisation of SMEs — Germany & India | qualitative research, expert interviews

BEng Mechanical Engineering

2014 – 2018

Gujarat Technological University — India

Thesis: Analysis and Optimisation of Submerged Arc Welding

LANGUAGES & CERTIFICATIONS

English — Professional proficiency (C1) | German — B1 (TELC certified, actively improving)

Google Foundations of Project Management (Coursera)
